

## The Accessibility Toolbox Matrix

### Dan Herlihy

	Computer	iPad	Chromebook	Android
<p><b>Scan &amp; Read</b></p> <p>These are programs or apps that can scan a printed page into a computer, display it onscreen, or take a picture of it then read the text aloud using text to speech</p>	<p><b>Scanning directly into the program using a flatbed scanner</b></p> <ul style="list-style-type: none"> <li>- Kurzweil 3000</li> <li>- Read &amp; Write Gold</li> <li>- Premier Scan &amp; Read</li> </ul> <p><b>Live Using a Document Camera:</b></p> <ul style="list-style-type: none"> <li>- Snap&amp;Read Universal in the Chrome browser with: Hovercam T5, Solo 8 - run document camera software from: <a href="https://thehovercam.com/livecam">https://thehovercam.com/livecam</a></li> <li>- Kurzweil 3000 Image Reader tool - (PC version only) select Image Reader from the Read menu in Kurzweil 3000 or from the Kurzweil Taskbar, select text in the image displayed under the document camera to be read aloud (Hovercam T3, Mini 5, Solo 8)</li> </ul> <p><b>Office Lens (Windows 10 and Office 365)</b> use document camera to capture image of printed page directly into Word, OneNote, OneDrive, then use Immersive Reader (part of Learning Tools) to read aloud. Can use iPad/iPhone app to take picture of page, save to OneDrive and open on computer in Office 365 to use Immersive Reader to read aloud</p>	<ul style="list-style-type: none"> <li>- <b>Prizmo</b> - Scanning, OCR and Speech (9.99 plus 2.99 for each voice) Can adjust what the OCR sees as text (editing underlying text) App runs OCR on the image <b>and produces a true PDF document</b> so PDF readers with TTS can highlight text and read aloud. App can also read text aloud by choosing Export, choose Read Text Aloud. Turn off Detect Page option in Settings. Can send to Claro PDF. Also translate.</li> <li>- <b>Prizmo Go</b> (free, in-app purchases - take picture of page, runs OCR, TTS Speech</li> <li>- <b>Office Lens</b> – (free) Take picture of page, open within app into Immersive Reader to read aloud, export to OneNote, Word, OneDrive, PPT, save as PDF or Photo Library</li> <li>- <b>Claro ScanPen Reader</b> (9.99) - take picture of page, use finger to select text to be read aloud. Does not save text.</li> <li>- <b>Snap&amp;Read</b> - free with school subscription to Snap&amp;Read Universal, take picture of page, can select area to read, adjust text complexity, save scan to photos</li> <li>- <b>Lectio</b> (4.99) Scan, OCR, reads aloud any word selected in the document</li> <li>- <b>Fine Scanner Pro: Scan and OCR</b> (4.99) - take picture of page, uploads to website to process for OCR (required to</li> </ul>	<p><b>Live Using a Document Camera:</b></p> <ul style="list-style-type: none"> <li>- Snap&amp;Read Universal extension for the Chrome browser with: Hovercam T3, T5, Mini 5, Solo 8 - run document camera software from cloud - <a href="https://thehovercam.com/livecam">https://thehovercam.com/livecam</a> - make sure you type <b>https</b></li> </ul> <p><b>Snapverter</b> - Chrome app from TextHelp - use in conjunction with Read&amp;Write for Google extension. Take picture of document with any device, drop file into Snapverter "Drop files here folder in Google Drive to convert (folder created by Snapverter in Google Drive). Converts to PDF, saves in "Finished" subfolder in Snapverter main folder. Open folder, right-click on file choose Open In - either Google Docs or Read&amp;Write for Google - to use the reading, highlighting tools on the Read&amp;Write for Google toolbar.</p>	<ul style="list-style-type: none"> <li>- <b>Text Fairy</b> - free, take image, performs OCR, will read loud but doesn't highlight as it does, can create PDF</li> <li>- <b>Claro ScanPen</b> (free) take image, performs OCR, select text with finger to read loud</li> <li>- <b>TextGrabber &amp; Translator</b> (by ABBYY, 4.99) take picture of page, crop, choose Read (upper right) runs OCR and converts to text. Open in apps such as Voice Aloud Reader, Easy Text to Speech Pro, Natural Reader for TTS. Save to OneDrive via share icon in upper right of document. Good for quick scan and read.</li> <li>- <b>KNFB Reader (free)</b> - designed for Android phones, take picture of page, processes and reads aloud</li> </ul> <p><b>PDF Scanner: Document Scan+ OCR</b> Free/4.88 - take picture, OCR</p>

	Computer	iPad	Chromebook	Android
<b>Scan &amp; Read</b>	<p>- Read &amp; Write Gold - <a href="http://www.texthelp.com">www.texthelp.com</a> - can use Screenshot Reader to select text in documents to be read aloud. Can use with Hovercam T3, Mini 5, Solo 8, iPevo iZiggy HD Wireless document cameras. Can't translate text under a live document camera window to another language.</p> <p>To use launch Read &amp; Write Gold, connect and launch the document camera software. Place a document under the camera, choose the Screenshot Reader tool and drag a box around text on the page displayed under the document camera and release. The text will be processed and read aloud.</p>	<p>create a free account).</p> <p>- <b>knfbReader</b> (99.00) take picture of page, runs OCR and reads back text. Image not saved as a PDF but high quality and accuracy with TTS settings, highlighting options, voices.</p> <p>- <b>OCR Scanner with Lead Tools</b> (free) take picture, runs OCR and saves as a PDF file to be read aloud using iPads built in Read Selected Text option, or export to PDF TTS readers</p> <p><b>Kurzweil 3000 Web License</b> - (subscription based) - logging into <a href="http://kurzweil3000.com">kurzweil3000.com</a> with user log-in, has ability to take picture of page from Computer menu, upload, processes and reads aloud, can and save.</p> <p>- <b>Go Worksheet</b> (free student app, 19.99 to create files) take picture, add interactivity, TTS, answer fields, drop down choices, more</p>		
<b>Language Translation</b>	<p>Kurzweil 3000 - <a href="http://www.kurzweiledu.com">www.kurzweiledu.com</a> (Mac/PC)</p> <p>- Read &amp; Write Gold - <a href="http://www.texthelp.com">www.texthelp.com</a> (Mac/PC)</p> <p>- Google Docs - choose Tools menu, Translate Document to translate to another language, Mac, PC, Chromebook - run from any web browser</p> <p>- Add Translator as an Add-in for OneDrive (<a href="http://www.onedrive.com">www.onedrive.com</a>) documents to translate selected text in documents (Mac/PC/Chromebook)</p> <p>- <b>Microsoft Translator</b> (free) integrated into Office 365, add-ons for OneDrive in Chromebook app, add-on</p>	<p>- <b>Prizmo</b> - can scan and translate to other languages (9.99)</p> <p>- <b>Microsoft Translator</b> (free) – speak, type or scan document for translation, can connect to other devices for on the fly translation for multiple languages at once</p> <p>- <b>Voice Translator</b> - on the fly translation (4.99)</p> <p>- 2 devices translator with speech to text (1.99) voice or text input, sends translated result to another device using app via Bluetooth, internet access needed for translation - English, French, Spanish, German, Russian</p> <p>- <b>Google Translate</b> (free) voice</p>	<p>- <b>Google Translate</b> - free extension, highlight then right-click on text</p> <p>-Instant Translate - free extension, highlight then use keyboard shortcut to translate</p> <p>-ImTranslator: Translator, Dictionary - free extension, highlight then right-click on text</p> <p>-TransOver - free extension, hover, click or select to translate (with text-to-speech)</p> <p>-Translate for Drive, app, translate a document from Google Drive, PDF, TXT, DOC, DOCX, more</p> <p>-Language Translator - app, paste in</p>	<p>- <b>Microsoft Translator</b> (free) – speak, type or scan document for translation, can connect to other devices for on the fly translation for multiple languages at once</p> <p><b>iTranslate Voice</b> (4.99) iPad and Android version, voice recognition and language translation</p> <p>- <b>ABBY TextGrabber + Translator</b> - take picture of printed text, performs OCR, translates, internet</p>

	Computer	iPad	Chromebook	Android
<b>Language Translation</b>	<p>for older versions of Office and Word, available for Edge browser</p> <p><b>Online:</b>            Google Translate - <a href="https://translate.google.com/">https://translate.google.com/</a>            - Online dictionary &amp; Thesaurus - <a href="http://translate.reference.com/">http://translate.reference.com/</a>            - Babylon - <a href="http://translation.babylon.com/">http://translation.babylon.com/</a>            - imTranslator - <a href="http://imtranslator.net/translation/">http://imtranslator.net/translation/</a>            - Bing Translator (Microsoft) <a href="https://www.bing.com/translator/">https://www.bing.com/translator/</a>            - Babblefish - <a href="http://babblefish.com/">http://babblefish.com/</a></p>	<p>recognition to TTS, Word Lens built in - use camera to focus on page instant translation appears over page, handwriting option with a stylus - converts to text and translates - <b>Kurzweil3000.com</b> (log in for subscription, language translation for documents)</p>	<p>text for translation            -igTranslator: Google™ Translator - extension, pop up translation, definition and TTS of selected word            -Read &amp; Write for Google - language translation of selected word in Google Docs and text on web pages using the browser toolbar            Kurzweil3000.com (log in for subscription, language translation for documents)</p>	<p>connection required            - <b>Google Translate</b> - free, requires internet connection, contains Word Lens option without internet - point camera at text for auto text conversion on the fly, import files, type text, voice recognition, TTS in converted language can use offline</p>
<b>Alternate Keyboards</b>	<p>PC - On screen keyboard found in the Control Panel, Ease of Access (scalable, switch accessible)            Click-N-Type (<a href="http://cnt.lakefolks.com">http://cnt.lakefolks.com</a>)  <a href="http://cnt.lakefolks.com/portable.htm">http://cnt.lakefolks.com/portable.htm</a></p> <p>Mac - download a keyboard as a dashboard widget. To activate the built-in keyboard:            - System preferences            - Keyboard            - Make sure Keyboard tab is selected, choose Show Keyboard &amp; Character Viewers in menu bar            - In the menu bar at top of screen choose the keyboard icon, Show Keyboard Viewer</p>	<p>Download keyboards from the iTunes app store to your iPad            - Open Settings on the iPad, choose General on the left, and Keyboard on the right - Choose Keyboards, Add New Keyboard - A list of any third-party keyboards you have downloaded will be listed. Select one from the list. It will be added to the currently installed keyboards.            Keyboards on iTunes include Lowercase Keyboard (OpenDyslexic font keys) The Math Keyboard, MyScript Stylus (handwriting recognition) SuperKeys Assistive Keyboard, Read&amp;Write for iPad, Keedogo Plus (color coded vowels, word prediction) Swype, MyScript Calculator, MyScript MathPad</p>	<p>On-screen keyboard found under Settings, Accessibility (contains voice recognition and word prediction)            Google Input Tools (change language)            Loderi (virtual keyboard, multiple languages)</p>	<p>Change keyboard under Settings, Language and Input</p> <p>Google Handwriting Input            Math Keyboard            Std Math Keyboard            Big Keyboard, SwiftKey            Keyboard with voice recognition and swype capability, Read&amp;Write for Android (word prediction and a read button, can also toggle Open Dyslexic font for keys), Google Keyboard - has voice recognition key            Big Keyboard, A.I Type            Tablet Keyboard (split keyboard, move, resize)</p>
